

WG1 CDTI subgroup telecon – 2/25/2004

Jonathan Hammer - MITRE
Bill Kaliardos - FAA
Jonathan Hammer - MITRE
Randy Bone - MITRE
Michael Petri – FAA
Sethu Rathinam – Rockwell Collins

Sethu was concerned about the lack of participation from other industry representatives. Boeing plans to start support in June. Participation is expected from Honeywell in Phoenix and Redmond. Sethu has sought participation from some other companies, as well.

As a result, the call was postponed until March 10, 1:30 to 3:30 PM to try and get better participation.

Started review of old CDTI draft MOPS at 3.3.3.1.5, where the Phoenix meeting left off.
