Jean-Claude – WG51 would like to express sympathy for last week's tragedy.

a) Status update from WG51 on their recent discussions, terms of reference.

Describe commonly applications that we are looking for.

Developed a work matrix.

October meeting agenda.

Take advantage of existing documents.

b) action item status

8-01-1 2 sources – NUP, initial hazard analysis that they will decide within the next few days.

8-01-2 Draft joint work matrix – done

8-01-3 Gave out documents to wg51 members – identifying others though. And passed on our stuff to others within wg51

c) Review and revise work matrix to incorporate WG51 contributions

steve will try to compress schedule to 8 months – starting September

c) Agenda for Brussels meeting

Wg51 telecon involvement 1 per month.

Approach spacing will be the application of interest?

Steve will try to have an update on ASSA and CD&R probing analysis.

e) (time permitting) start on OSED / WG4 outline coordination discussion (see attached application outline)

Steve went through some of the issues around the outline coordination. Have the OSED version from wg51; from wg4 side – we came up with an outline. Our approach to the

outline was that we knew we would have to deal with rsp and service levels – we took the application and said “what are all the external factors that influence rsp and safety.” We then categorized these into atc, flight crew, scenarios, etc..

How we deal with the 2 different outlines.

Follow-up from today --
